Chairman Tom Wheeler  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Re: Business Data Services in an Internet Protocol Environment, WC Docket No. 16-143;  
Special Access Rates for Price Cap Local Exchange Carriers, WC Docket No. 05-25

Dear Chairman Wheeler:

I write today with regard to docket numbers 16-143 and 05-25. As a small business owner whose business is focused on technology consulting, I can attest that broadband access and rates are of concern to a number of my clients.

For years, the FCC has said it would address the issues pertaining to broadband access reform. And, for years, no substantial action has occurred. When compared to other developed countries, the United States continues to lag in average internet speed and pricing. In order for consumers to benefit from broadband access, the FCC must ensure certainty for those investing in infrastructure projects. A data-based framework that continues promoting competition among providers must be developed to ensure the United States remains competitive in terms of broadband speed and broadband cost.

Thank you for the opportunity to share my thoughts with the commission with regard to the aforementioned dockets.

Sincerely,

C. Ventura
